### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach a micro-oscillation element with a movable main section, a first connecting section that connects a movable main section and a first frame and defines a first axis of rotation for a first rotational operation of the movable main section with respect to the first frame, and a second connecting section that connects the first frame and a second frame and defines a second axis of rotation for a second rotational operation of the first frame and the movable main section with respect to the second frame, where the micro-oscillator includes a first drive mechanism for generating a driving force for the first rotational operation and a second drive mechanism for generating a driving force for the second rotational operation, where the first axis of rotation and the second axis of rotation are not orthogonal, and wherein the first frame has four sides including an electrode supporting side, a part of the first drive mechanism extending from the electrode supporting side of the first frame toward the movable main section, and having a part of the second drive mechanism extending from the electrode supporting side of the first frame toward the second frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
